Viewership Insights Report

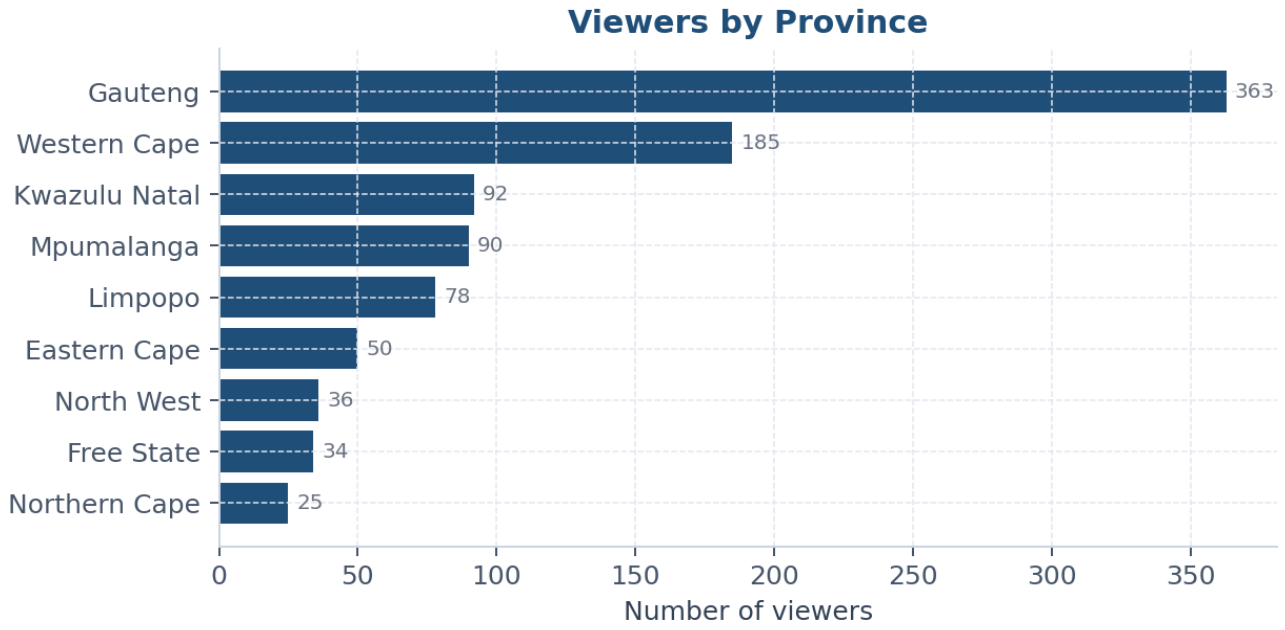
An overview of audience composition, engagement and viewing behaviour across South African provinces.

1,000	2,328	2.33	1.79
Total viewers	Total views	Avg views / viewer	Avg channels / viewer

Executive Summary

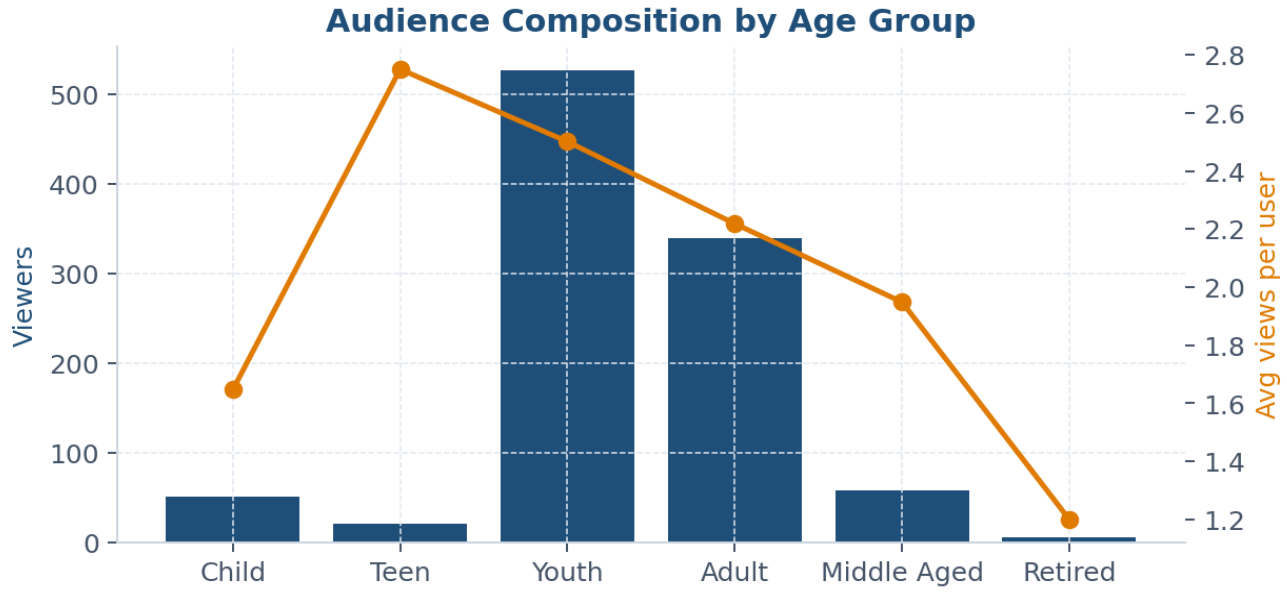
The dataset captures **1,000** unique viewers generating **2,328** total views across South Africa. **Gauteng** is the largest market, accounting for **36.3%** of viewers, while **afternoon viewing** is the dominant viewing window. The audience skews male (**83.8%**) and young — **86.6%** are Youth or Adult. Engagement (avg views per user) is highest among Youth and Teen segments, suggesting growth opportunities in younger-skewing content slates.

Geographic Reach

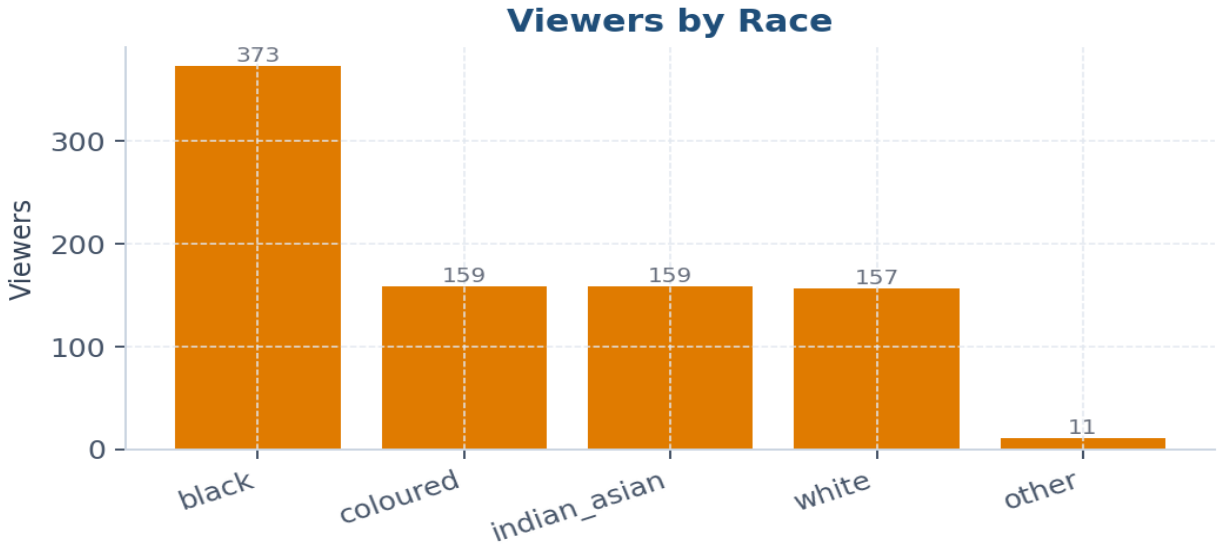


Three provinces — **Gauteng, Western Cape and KwaZulu-Natal** — together account for **64.0%** of the audience. Smaller markets like Northern Cape and Free State remain under-served and represent expansion potential.

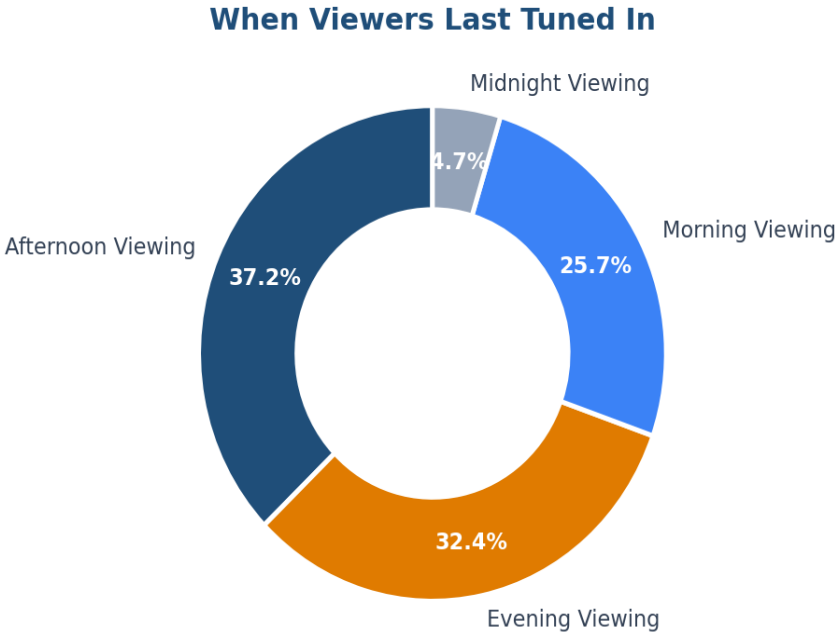
Audience Demographics



Youth viewers form the largest segment and also show the highest average views per user, making them the most valuable demographic for engagement-driven monetisation.

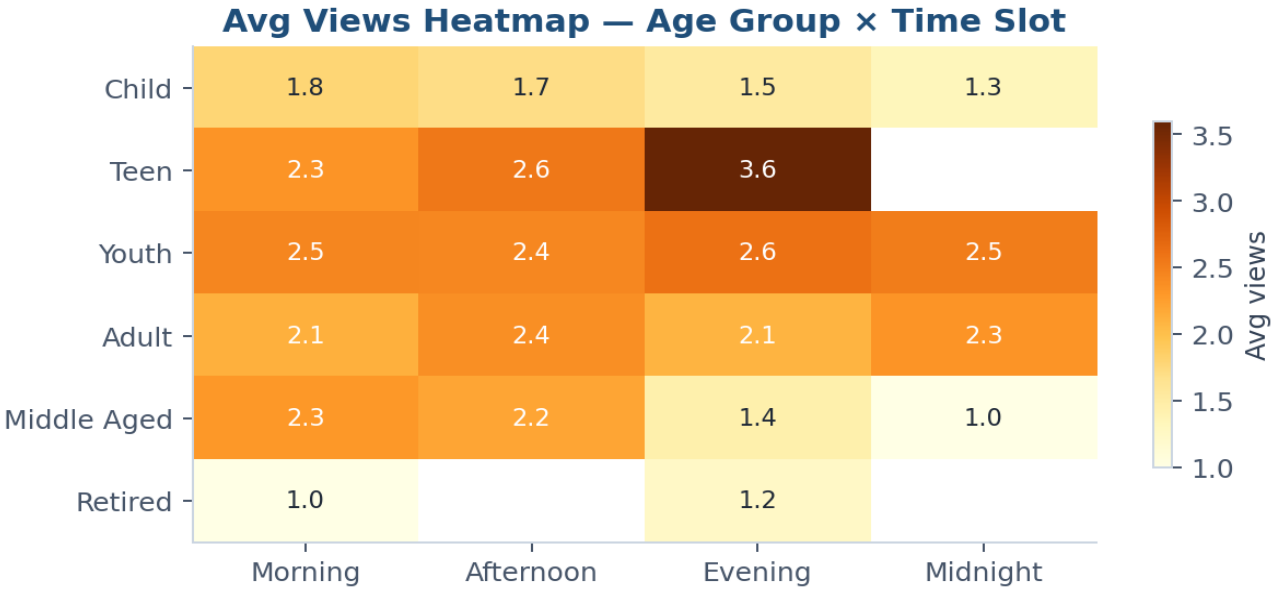


When Audiences Watch



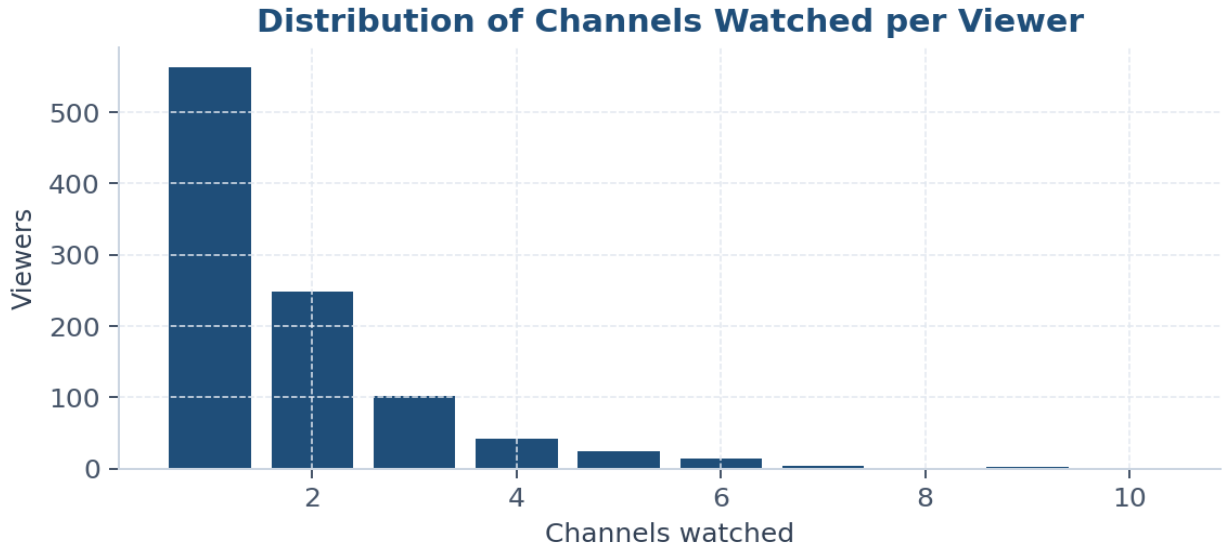
Afternoon and **Evening** slots dominate, together representing **69.6%** of last-recorded viewing. Midnight viewing is small but exists across all age groups, indicating a niche always-on audience.

Engagement Heatmap

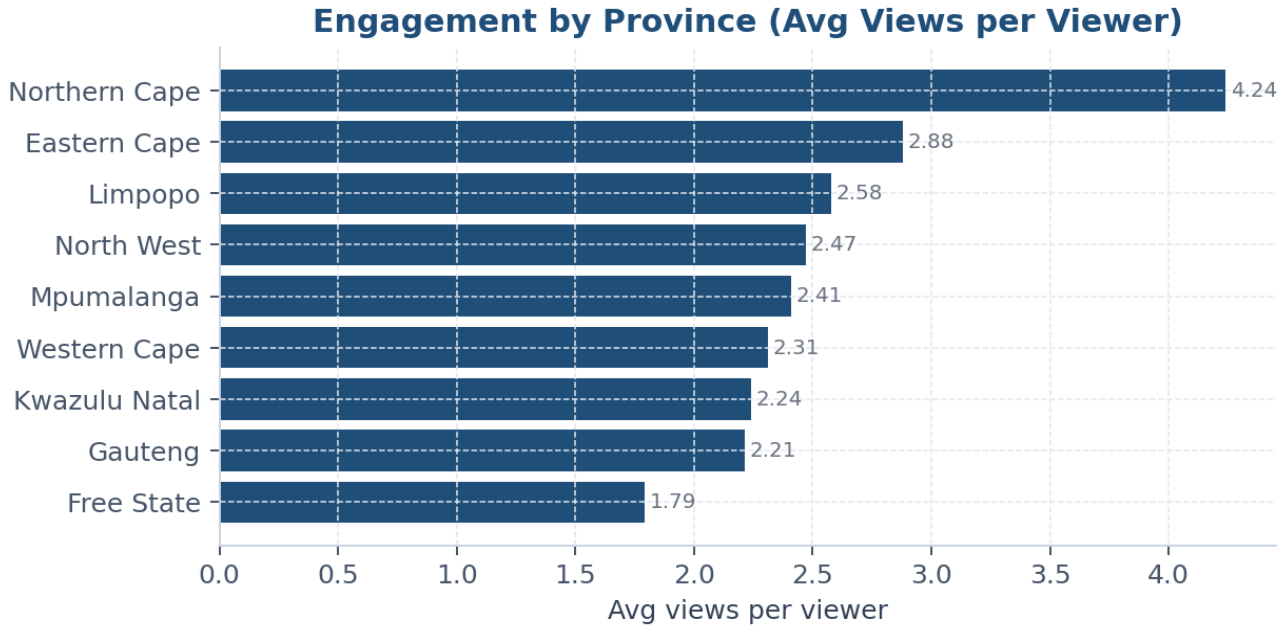


Avg views per viewer broken down by age group and time slot. Hot cells highlight the most engaged combinations — useful for targeted scheduling.

Engagement Depth



Most viewers stick to a small number of channels (median = **1**), but a long tail explores up to 10 channels. These multi-channel users are prime cross-promotion targets.



The most engaged province on a per-viewer basis is **Northern Cape** (avg **4.24** views), while **Free State** shows the lowest engagement (avg **1.79**) — a candidate for retention campaigns.

Key Takeaways

• Gauteng leads in volume; Northern Cape leads in per-viewer engagement.

• Youth (18–34) drive both reach and engagement — prioritise content for this segment.

• Afternoon + Evening slots together capture the bulk of last-viewing behaviour.

• A meaningful share of users (~14%) have missing demographic fields — invest in data capture.

- Multi-channel viewers (4+ channels) are a small but valuable cross-promotion audience.
